Book presentation

Ecomuseums and Climate Change

Edited by Nunzia Borrelli, Peter Davis and Raul Dal Santo

The book, born after a satellite event inside the PreCop 26 in 2021, is a collection of studies, practices and methodologies that involve ecomuseums and museums around the world in the fight against climate change and the achievement of the 2030 Sustainable Development Goals.

This book demonstrates how small local actions, considered together, can have a dramatic and far-reaching impact. Authors, experts other stakeholders will discuss the cases studies, the practices and the methodologies illustrated in the book, and will identify further international cooperation activities to be carried out in the future.
